

INSTALLING CRYPTOSTOPPER

In Five Easy Steps

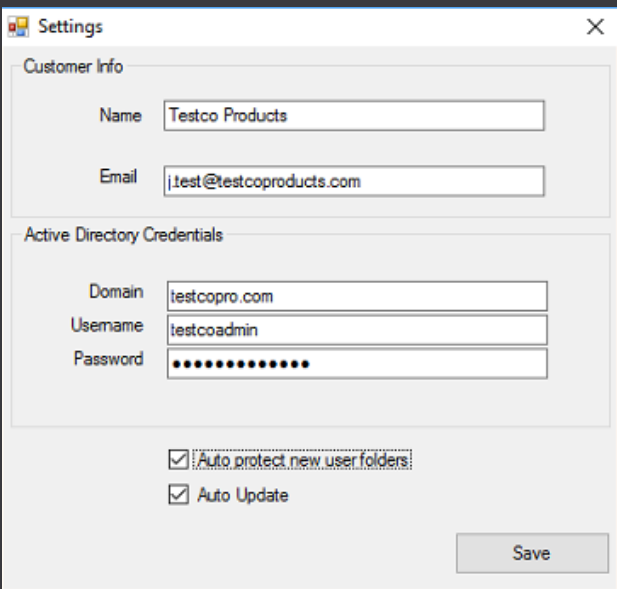

1. RUN INSTALLER

Double-click CryptoStopper.exe and run the installer. Reboot when prompted.

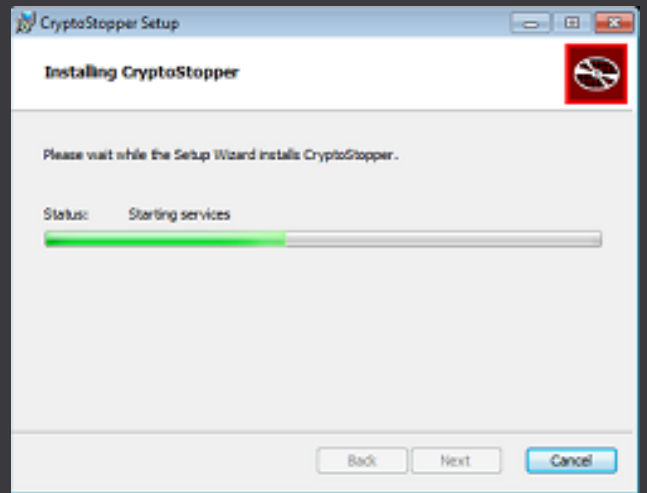

3. LAUNCH CRYPTOSTOPPER

Launch CryptoStopper from the desktop icon or tray icon to configure settings and folder protection.

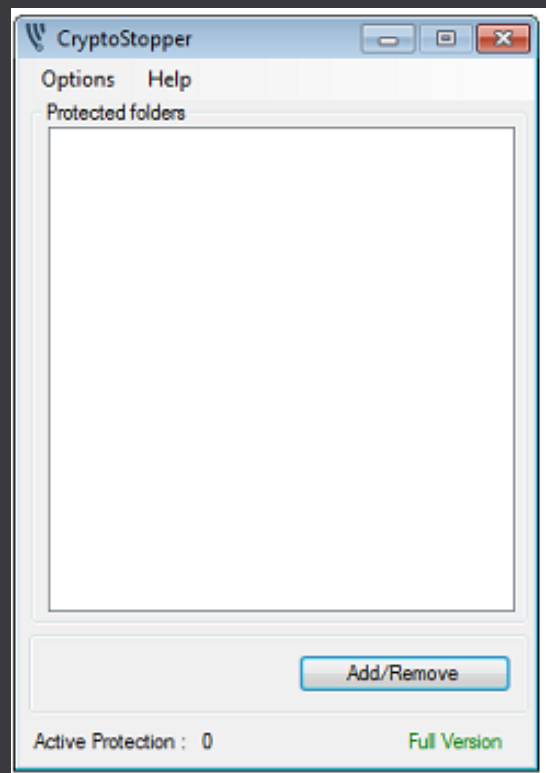

5. CONFIGURE FOLDER PROTECTION

- Click Add/Remove Folders
- Click + to Expand C:\
- Check all folders except: C:\Windows and C:\Temp
- Expand C:\Users
- Check all user folders
- Check all server shares
- Click Update

2. ACTIVATE CRYPTOSTOPPER

Enter your 16-digit key to activate CryptoStopper

4. CONFIGURE CRYPTOSTOPPER SETTINGS

Enter a name and email address for alert notifications. Configure admin credentials only on CryptoStopper Server.
